DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-6, drawn to a battery system estimating a state-of-charge of a battery by measuring the terminal voltage, classified in class 320, subclass 132.

II. Claims 7-19 drawn to a method of estimating a state-of-charge of a battery using modeling and data processing, classified in class 702, subclass 64.

2. The inventions listed in groups I and II are distinct, each from the other because of the following reasons:

Inventions II and I are related as apparatus and method (process) for its practice. The inventions are distinct if it can be shown that either:

a)the apparatus as claimed can be used to practice another and materially different process, or

b)the method as claimed can be practiced by another materially different apparatus or by hand

(M.P.E.P. 806.05(e)).

In this case, the method of estimating a state-of-charge of a battery using modeling and data processing, as stated in group II, can be practiced by an apparatus, such as one, which does not require a meter.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter and their different classification restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Art Unit: 2838

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
